

*I*t started as a small plant in the wasteland. We do not discriminate plants from the wasteland; instead we pick some up and transfer them to a good soil. Nevertheless, this is not just any kind of plant but it is the greenest plant among its peers.

We vacuum clean the public high schools among the poorest of the poor children in Cebu City and select those with the best potential to be future leaders and role models.

We do not like to see an asset plant dying because it is not taken care of. We feel an urge to develop their assets to their fullest if possible.
